LANGUAGES

English C1

French C2

PROFILE

Professional with a Master's degree and three years of experience, including one year specialized in cybersecurity. Seeking a dynamic company to contribute to the protection of information systems. Strong skills in risk management and network security, ready to tackle new challenges in the cybersecurity field.

PROFESSIONAL EXPERIENCE

Cybersecurity Analyst

ManpowerGroup France 2024

- Strengthened the security architect's activities by integrating security by default and by design in DSI and business projects.
- Made implementation decisions and conducted continuous controls, including vulnerability management and operational security.
- Developed skills in vulnerability management, operational security, security audits, continuity planning, and authentication technologies.
- Collaborated with various teams and managed complex security projects.

System Administrator

Thermador Groupe 2022

- Implemented security policies and deployed software solutions to protect systems.
- Provided technical support, integrated access management systems, and reduced security risks.
- Identified and fixed vulnerabilities, configured firewalls, and worked on Linux and Windows servers.

Full-Stack Developer

2c2l 2020, 2021 and 2023

- Developed robust and scalable applications, collaborating with teams and following best practices.
- Experienced with databases and API integration to enhance functionalities.
- Delivered high-quality code and solved complex technical challenges with attention to detail.
- Passionate about staying updated with industry trends and continuously improving skills.
- Effective in agile environments and skilled in communication.

Freelance

MR Project (self-employed) 2020 -

- Successfully completed various projects including SEO optimization, security improvement, and web development.
- Helped clients improve online visibility and rankings through keyword research, page, and content optimization techniques.
- Designed and developed user-friendly, responsive, and high-performance websites. Delivered high-quality work on time, maintaining effective communication with clients.
